WildFly and Java versions supported by the X4 Server

Our development and support team use AdoptOpenJDK to develop and test the features. The X4 server also runs on other distributions of OpenJDK. If errors occur due to a problem in the Java distribution, please contact the Java distributor for troubleshooting.

Starting with version 7.0, the X4 Server ships with WildFly 21.0.1 and Azul Zulu 11.0.11 integrated. Previous versions shipped with the WildFly and Java versions listed in the following table.

X4 Server version	Supported WildFly version	Supported Java versions
